Compatibility with Windows 7

All of our GUI's are compatible with **Windows 7**.

The security requirements of Windows 7 are comparatively higher than any previous Windows operating system. Because of this sometimes even genuine applications too are unable to run properly under Windows 7.

To make all of our GUI's run properly under Windows 7, we recommend the users to follow the below mentioned steps.

- 1. First of all install our **GUI**.
- 2. Next go to 'Start > Control Panel'.
- 3. Here click 'Programs'.

Adjust your computer's settings	View by: Category -
System and Security Review your computer's status Back up your computer Find and fix problems	User Accounts and Family Safety Add or remove user accounts Set up parental controls for any user
Network and Internet View network status and tasks Choose homegroup and sharing options	Appearance Change desktop background Adjust screen resolution
Hardware and Sound View devices and printers Add a device	Clock, Language, and Region Change keyboards or other input methods Ease of Access
Programs Uninstall a program	Let Windows suggest settings Optimize visual display

4. Under 'Programs and Features' click 'Run programs made for previous of windows'.

5. Here under 'Program Compatibility Wizard' click 'Next'.

6. Here under 'Select troubleshooting option' select the first option 'try recommended settings'.

7. Here under 'Select the program you're having problems with', a list of all the installed programs will be generated and displayed. Here first of all select our GUI from this list. And then click 'Next'.
